

Falls of the Ohio State Park and Interpretive Center Winter Programs

Temporary Exhibit

Lewis and Clark: Mysteries of the West

December 17, 2005 - March 28, 2006

The year is 1805. The Lewis & Clark Expedition makes the perilous journey from Ft. Mandan to Ft. Clatsop. How did they manage to survive? What was it like to be away from home for an extended period? This exhibit was developed cooperatively with the bicentennial committee and the Filson Historical Society.

Special Programs:

Urban Mammals

December 28 from 1:00 to 4:00

Discover the animals that live in our urban environment. It is truly amazing how many animals actually live here. Where do they sleep? What do they eat? Bryan Lewis, naturalist at Otter Creek Park, leads you through the urban "jungle."

Geology of Kentuckiana

December 29 from 1:00 to 4:00

The rocks and landscapes tell the story of Kentuckiana's ancient history. How old are the oldest rocks in the region? Where are the earthquake "hot spots?" What formed the knobs? Why do some rocks have fossils and others do not? Alan Goldstein, interpretive naturalist at the Falls of the Ohio State Park, will explore our geological story.

Winter Garden Fair

February 25 from 10:00 to 4:00

This annual garden fair is in partnership with organizations that maintain gardens around the Interpretive Center. Winter is an ideal time to plan your garden and learn about seed starting and plant propagation. The Daylily Society of Louisville, Sunnyside Master Gardeners and Kentuckiana Herb Society each provide a program and information booth to help area gardeners. They will be available to answer questions about their gardens and their plant selections at the Park.
